* RBR is "rolled-back rate"

This data is being provided pursuant to 2008 House Bill 909 (Chapter 2008-197, L.O.F., section 9). Beginning with the 2008 tax roll, certain data must be published on the Florida Department of Revenue's website and websites of all property appraisers, if they have a website. For each municipality in the county and for the county government, current and previous year's millage rates, the current year percentage increase in taxes levied above the rolled-back rate and the annual percentage increase in total non-voted property taxes levied, are to be included on the website. In addition, information showing the distribution of property taxes levied among the various classifications of property is to be published. This includes homestead, non-homestead residential, new construction, commercial and industrial property as well as tangible personal property. This information must be published not later than 90 days after the Departments receipt of the extended tax rolls pursuant to s. 193.122(7), F.S. Property appraiser websites must only include data for their own county. The following conforms to the suggested data layout and has been submitted to the Florida Department of Revenue.
